
Field oscillations: exact vs Markov
exact, $\varepsilon_0 = 10$
Markov, $\varepsilon_0 = 10$
exact, $\varepsilon_0 = 100$
Markov, $\varepsilon_0 = 100$
$\varepsilon(t)/\varepsilon_0$
$te\sqrt{\varepsilon_0}$

Maximum occupation ($\varepsilon = \pi/\ln 2$ dotted)
exact (Bloch)
Markov (Pauli-blocked)
max f
ε_0

Plasma frequency (mean of last 3 half-periods)
exact $\omega_p/(e\sqrt{\varepsilon_0})$
Markov
$\omega_p/(e\sqrt{\varepsilon_0})$
ε_0

Equation of state (parallel)
w_{tot}, $\varepsilon_0 = 10$
$w_\parallel^{pl}$, $\varepsilon_0 = 10$
w_{tot}, $\varepsilon_0 = 100$
$w_\parallel^{pl}$, $\varepsilon_0 = 100$
$te\sqrt{\varepsilon_0}$
